

Cornerstone

Empowering Colleagues with Smart Tools

"I like how simple it is!"

"I'm not a techy person, but that's easy enough."

Issues to resolve

- Reduce time spent on admin tasks.
- Reduce time on desktop computers.
- Avoid duplication of work.
- Improve communication.

What we had

- Printed Rotas.
- Word processed Personal Plan & form templates.
- Only managers could update system information.
- Information transferred manually between departments.

Our solution

- Fully integrated organisation-wide system.
- Smart devices.
- User friendly software: e.g. Access Mobizio.
- Keep it simple.

Our colleagues' feedback

- "I can see the potential for clear recording and sharing of information and a reduction in paperwork."
- "This will really help us improve the quality of support as a team."
- "You can access the information you need quickly."
- "I love that! I will be able to sit with the person I support on the sofa, not at the computer."
- "Normally I have to email this to my manager but now I can add it myself."
- "Time saving and relevant to service requirements."
- "Very reassuring that this new technology will benefit staff."
